**ResMed Air Solutions**

great sleep

a new beginning  
in great sleep

[ResMed.com/AirSolutions](http://ResMed.com/AirSolutions)

With ResMed Air Solutions, you'll find that getting a good night's sleep has never been easier. Our new series of masks, devices and technologies work seamlessly together so you can get the comfort and support you need at every stage of your sleep therapy journey.

## Out-of-the-box comfort

The AirSense™ 10 and AirCurve™ 10 devices have been designed to make therapy easy. With no complicated settings or menus to navigate, simply press Start and you're ready to go. Each device comes with the HumidAir™ heated humidifier built in so you can enjoy the benefits of humidification in one easy-to-use system. And when used with the optional ClimateLineAir™ heated tube, your device has been designed to automatically deliver the optimal temperature and humidity for the ultimate comfort experience.

Coupled with the new ResMed AirFit™ mask series, you'll be sure to find the right fit for you.

Choose from the AirFit P10 nasal pillows mask, the AirFit N10 nasal mask or the AirFit F10 full face mask for a lightweight, comfortable solution designed to make therapy easy—no matter which one you choose.

## A comfortable start

The new AutoRamp™ feature with sleep onset detection\* helps make therapy comfortable from the moment you turn on your device. AutoRamp works by delivering a low pressure to help you fall asleep with ease. Once it detects you're asleep, it comfortably increases the pressure to ensure your prescribed level is delivered the moment you need it.

\*Only available in AirSense 10 devices

## A restful night

Every device has an ambient light sensor that adjusts the brightness of the screen based on the amount of light in the room. So if you get up during the night and need to pause your therapy, the screen will stay dim so it doesn't disrupt your partner. The screen's back light also turns off automatically to help you fall back to sleep without disturbance. And with ResMed's Easy-Breathe motor built into each device, you and your partner can enjoy whisper-quiet sleep, every night.

## Personalized support

Like your own sleep coach, our new online program, myAir™ provides support during every stage of your treatment journey. By giving you access to your therapy data, it lets you continually track your progress and see how well you're doing. Emails or text messages can also provide helpful education and encouragement to support you along the way. As you mark your successes and celebrate your milestones with awards and badges, you'll stay motivated to keep going.
